The screenshot shows a web page with a dark navigation bar at the top containing links: Home, Services, About Us, Contact, Clients, Book with Us, and Team Access. The main content area has a light gray background. At the top of this area is the heading 'Contact Us' in bold. Below it is a subheading: 'We'd love to hear from you! Whether you have a question, need help, or want to discuss a project, feel free to get in touch.' In the center is a white contact form with a light gray border. The form contains three input fields: 'Name:' with placeholder text 'Your Name', 'Email:' with placeholder text 'Your Email', and 'Message:' with placeholder text 'Your Message'. Below these fields is an orange button labeled 'Send Message'. At the bottom of the form area is a section titled 'Our Contact Information' in bold. Below this title are three lines of text: 'Email: contact@softwareconsultancy.com', 'Phone: +123 456 7890', and 'Address: 123 Software Lane, Tech City, 10001'.

```

The screenshot shows a web application interface for managing client bookings and contact messages. The interface is displayed within a browser window with a 'Logout' link in the top right corner. The main content area is titled 'Manage Client Bookings and Contact Messages' and is divided into two sections: 'View Records' and 'Update Records'.

The 'View Records' section contains two buttons: 'View Client Bookings' and 'View Contact Messages'.

The 'Update Records' section contains a form for updating a record. The form has the following fields:

- Booking ID: A text input field.
- Client Name: A text input field.
- Phone: A text input field.
- Date: A date picker with a calendar icon.
- Email(not necessary): A text input field.

Below the form is an 'Update Booking' button.

The 'Delete Records' section contains a form for deleting a record. The form has the following fields:

- Record ID: A text input field.

Below the form are two buttons: 'Delete Booking' and 'Delete Message'.

The footer of the application shows the copyright notice: '© 2024 Software Consultancy Firm. All rights reserved.'

### Explanation:

The screenshots above show the different web pages of the software consultation firm and their html codes. The pages include:

A homepage which shows the user a brief introduction of the firm.

A services page which goes into detail about the services offered by the firm.

An about us page that show the mission, vision and an insight to the team members.

A contact page where there is a form that the user can write to the firm.

A clients page that shows the firm's past clients.

A book with us page that shows a form where the client can book with the firm.

A team access page which allows specific members to access a page which they can update, delete and view records.

**Explanation:**

This is the CSS code used to style the web application.

# JavaScript

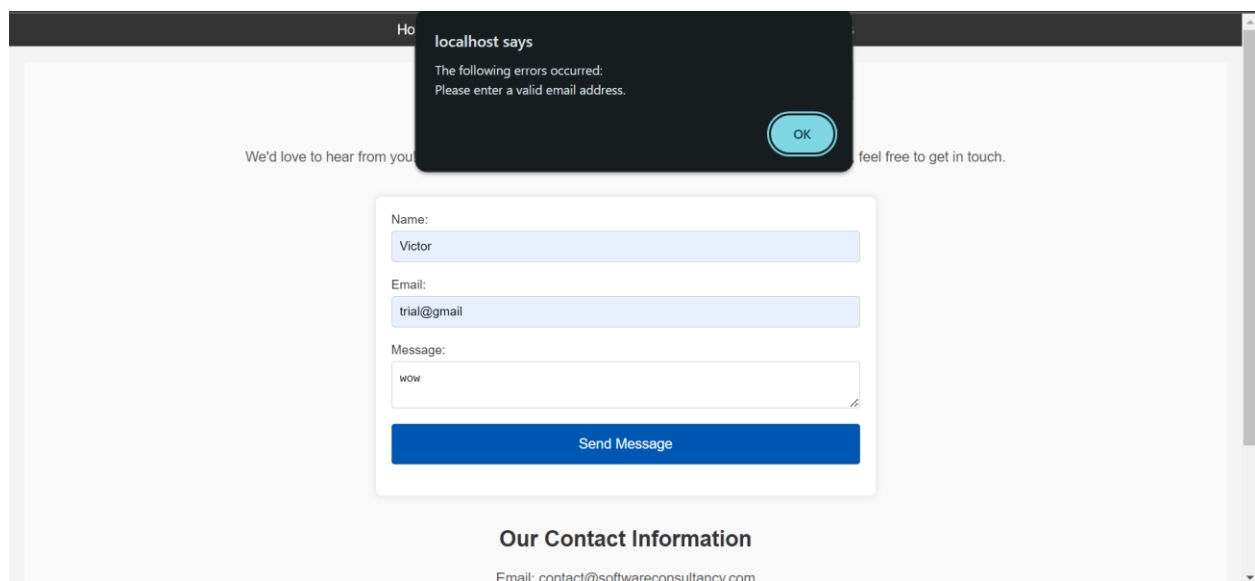

```
document.addEventListener("DOMContentLoaded", function() {  
    // Form validation and submission  
    document.getElementById('contactForm').addEventListener('submit', function(event) {  
        // Prevent the default form submission behavior  
        event.preventDefault();  
  
        // Get form fields  
        var name = document.getElementById('name').value.trim();  
        var email = document.getElementById('email').value.trim();  
        var message = document.getElementById('message').value.trim();  
  
        // List of validation errors  
        var errors = [];  
  
        // Validate Name  
        if (name === "") {  
            errors.push("Name is required.");  
        }  
  
        // Validate Email  
        var emailPattern = /^[^ ]+@[^ ]+\.[a-z]{2,3}$/;  
        if (email === "") {  
            errors.push("Email is required.");  
        } else if (!email.match(emailPattern)) {  
            errors.push("Please enter a valid email address.");  
        }  
    }  
});
```

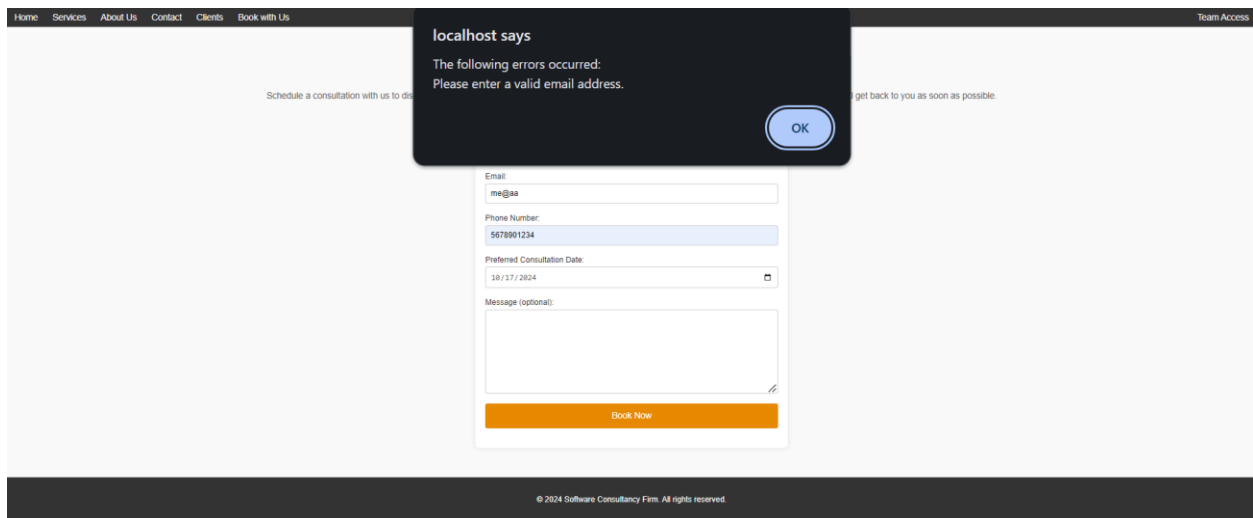

```

// Validate Message
if (message === "") {
    errors.push("Message cannot be empty.");
}

// Check if there are any errors
if (errors.length > 0) {
    // Show the error messages in a popup
    alert("The following errors occurred:\n" + errors.join("\n"));
} else {
    // If no errors, submit the form using the form's submit method
    this.submit();
}
});
});

```

## Explanation:

This shows the JavaScript code that is used to validate forms in the website.
